WE BUILD BIG BRANDS

AN ISO 27001:2013 Certified Company

WEB APPLICATION
PENETRATION TESTING

This type of testing focuses on identifying vulnerabilities in web applications, such as SQL injection, cross-site scripting (XSS), and cross-site request forgery (CSRF). Our Web Application Penetration Testing focuses on identifying and addressing the most critical security risks as outlined by the globally recognized OWASP Top 10 standard.

Key Highlights

Risk Prioritization:
Our assessments focus on the highest-risk vulnerabilities, ensuring the most critical threats are addressed first.

Industry Standard Compliance:
Align your security posture with globally recognized frameworks and compliance mandates.

Proven Methodology: Rigorous testing for vulnerabilities such as:

- Injection Attacks: Prevent SQL, Command, XML, HTML and other forms of injections.

- Broken Authentication: Ensure secure authentication & session management

- Sensitive Data: Protect sensitive information from unauthorized access.

- Cross-Site Scripting: Mitigate the risk of malicious scripts affecting users

- Security Misconfigurations: Identify and resolve configuration errors that expose systems to attack.

✔ Actionable Insights:
Detailed reporting with clear remediation steps to help your development teams resolve issues efficiently.

✔ Proactive Defense:
Stay ahead of emerging threats by continuously aligning your security measures with the evolving OWASP Top 10 list.

Process Flow

Requirement Gathering
Understand the application scope, user roles, and functionality.

Reconnaissance
Collect information on the application, such as URLs, input fields, and third-party integrations.

Vulnerability Identification
Perform dynamic testing to detect issues like SQL injection, XSS, and CSRF.

Exploitation
Attempt to exploit identified vulnerabilities to understand their impact.

Risk Assessment
Evaluate the severity of each vulnerability based on potential risks.

Report Generation:
Provide detailed findings, proof of concepts (PoCs), and remediation guidance.

Revalidation Testing:
Validate that issues are resolved after remediation.

WHY CHOOSE HYRROKKIN?

CERTIFIED EXPERTISE

Our team comprises of certified cybersecurity professionals with years of experience in identifying and mitigating vulnerabilities.

COMPREHENSIVE TESTING

We provide end-to-end VAPT services. This includes web, mobile, API, network, IoT, wireless, and cloud penetration testing.

TAILORED SOLUTIONS

Every business is unique, and so are its security needs. We customize our testing methodologies to align with your specific requirements.

GLOBAL STANDARDS

We adhere to internationally recognized frameworks like OWASP standards to ensure top-tier security assessments

ACTIONABLE INSIGHTS

Our reports are designed to be technical and strategic, helping teams resolve issues & decision-makers prioritize investments.

POST-TESTING SUPPORT

Trusted by businesses across industries, we have a strong history of empowering organizations to achieve robust security

ENGAGEMENT MODELS

✔ Ideal for businesses with a single project or periodic security needs.

✔ Quick identification of vulnerabilities for immediate resolution.

✔ Suitable for compliance audits or ad-hoc security checks.

A — ONE-TIME TESTING

B — CONTINUOUS TESTING
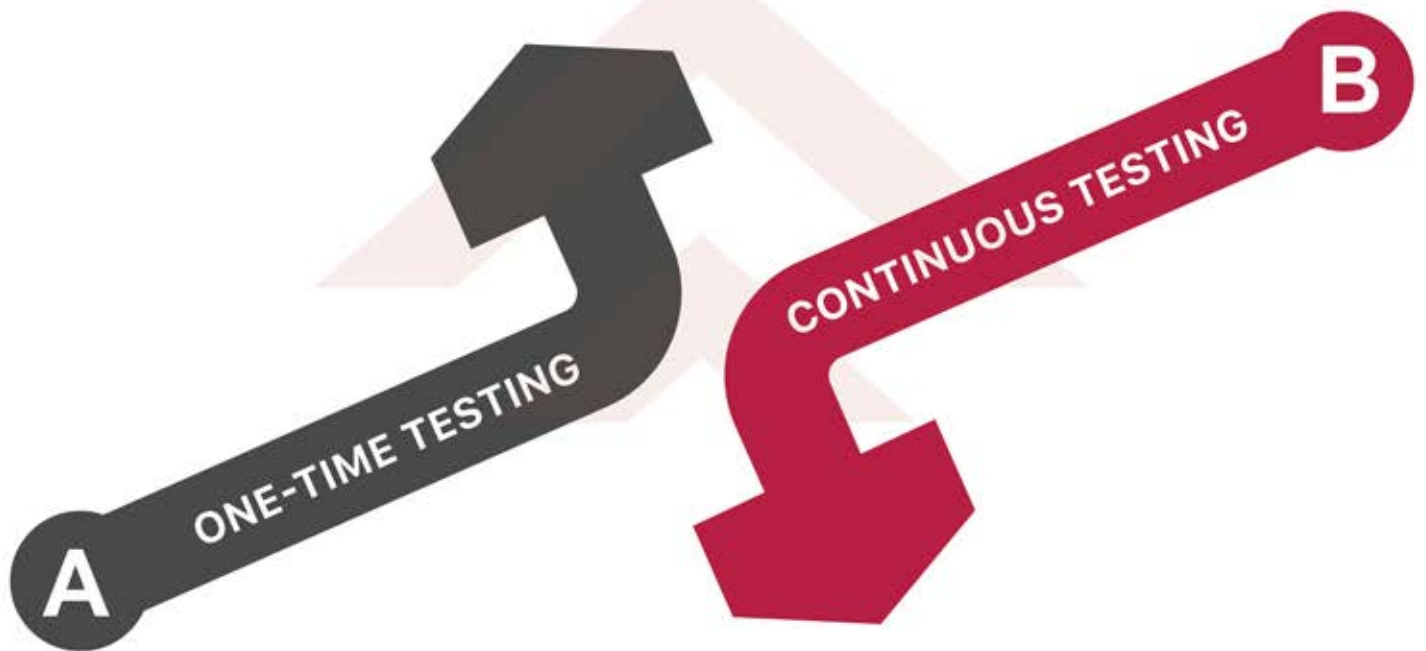

✔ Regular security assessments to stay ahead of emerging threats.

✔ Proactive detection and mitigation of vulnerabilities.

✔ Essential for organizations with frequent software updates or high-security requirements.

ABOUT OUR
CYBER SECURITY SERVICES

At Hyrrokkin Branding Services Private Limited, we offer robust cybersecurity solutions to empower organizations in securing their digital assets. With a strong history of uncovering and addressing vulnerabilities, we ensure your systems are well-protected against ever-evolving cyber threats.

Our skilled team utilizes advanced tools, proven methodologies, and industry best practices to deliver customized security services. Whether it's safeguarding web applications or securing IoT devices, we provide comprehensive testing solutions to protect your critical assets and ensure compliance with regulatory standards.

Discover our specialized services tailored to address the security demands of today's dynamic business environment:

1. Web Application Penetration Testing

2. Mobile Application Penetration Testing

3. API Penetration Testing

4. Network Penetration Testing

5. Wireless Penetration Testing

6. Cloud Security Testing

7. Compliance Audit

8. Configuration Review
